TUNS of WIRE WANTED.—
Proposals are invited by the undersigned, on the part of the NIAGARA FALLS INPERNATIONAL BRIDGE COMPANIES, for the construction of the win cables of the Railroad Suspension Bridge, of 300 feet span to be erected over the Niagara River, below the Faila for the delivery of ONE MILLION OF POUNDS OF IRON WIRE, or any portion of it, as t less than 100,000 fbs., at the site of the bridge, on the following conditions:

1. The wire is to be of No. 19 size, so that 20 feet will weigh exactly one pound.

2. The sacins to weigh no less than 18 lbs. As offer for 30 to 40 lbs with be greatly preferred.

3. The wire must be finished with a lime cost, smoothed ever, both ends of the same thickness.

4. It must be finished in three holes, or nearly se hard as spring-wire.

5. The iron must have been manufactured of the best quality of charcoal blooms, which will make hard wire of gree elasticity, strength, three and toughness.

6. The blooms must have been manufactured of cold-bind charcoal pla and not of anthretie pls, nor of hot-blast oils, and the finished the wire is to be drawn.

8. The wire must be drawn on blocks of no less than two feet in diameter.

9. It must be put up in bundles of 200 lbs., as near as can be seen in the second of the second bundless of the less than two feet in diameter.

the quality of the iron, of which the wire is to be drawn.

3. The wire must be drawn on blocks of no less than two feet in diameter.

9. It must be put up in bundles of 200 lbs, as near as can be done, a thout small skeins.

10. The wire is to be delivered in five equal portions due to the must be flay. June, July, August, and Suptember of next year.

11. On delivery the wire will be examined and tested is the following manner: Of every 5 bundles, or 1,000 lbs, on skain will be pelected, and suspended between two post 400 feet apart, the one end attached to a capetan, by which it will be gradually basiled on until it breaks. The condition now is, that this wire a ust not break with a greater deflaction than 9 toches, which is equivalent to 1,300 lbs, or 90,000 per superfloais inch of solid wire section. If it stands the test, then further examination of that 1,000 lbs, to respect to other qualities, will be continued; but if not, it will be rested by bending at a the disposal of the contractor.

12. As regards toughness and fibre, each end of a skein will be tested by bending its mare over the jaws of a large part of new and sharp piners, and overding it back again. The wire must stand this test without the least sign of failure. Its hardness and elasticity will at the same time be easined the second of the contractor. Its hardness and elasticity will at the same time be assumed by bending and astraging, also by harmmering, fling an notching the ends, which forms part of the operation of splicing.

13. Such lots as have stood the various tests satefactorily, will then be accested conditionally, and 80 per cent. It full value will then be paid to the contractor in bankable funds.

14. The 20 per cent. will be reserved for four months.

TO BUILDERS.—Proposals will be redelved until the 4th September next, at the Transfer
Office of the New-Jersey Zine Company, No 51 Liberty-4t,
for the ERECTION of a BRICK BUILDING at the Company's works, at Newark, New-Jersey. The Building to 8
150 feet long, 56 feet wide and four stories high Specifies
tions can be had, and a plan seen, unon application at the 4
fire to JONATHAN TROPPER, Pressurer. New-York, 26th August, 1852.
